

MISSION STATEMENT

The Health Sciences and Human Resources Academy offers students a challenging college preparatory program that will enable them to continue their education in service related programs: health care, education, and customer/community services.

VISION

Through a career pathways approach, students while still in high school will be able to determine if they are suited to any of the people-focused careers that are represented by this academy. Students are also encouraged to explore opportunities available through guest speakers, tutoring, field trips, community service, communication skills, hands-on training, job-shadowing, and internships. Opportunities to connect with on-going research and to obtain certification in assorted skills areas will also be available.

Learning partnerships have been developed with Houston Community College, Baylor College of Medicine, University of Houston Downtown, and Rice University.

Students in this academy are encouraged to participate in Waltrip's Magnet Program for Research and Technology and the Advanced Placement program.

Students are further encouraged to be active in community service. A wide array of programs is available and eager for your participation.

Clubs and Organizations

Health Occupations Students of America
Family Career and Community Leaders of America
Texas Association of Future Educators

Destiny is not a matter of chance; it's a matter of choice.
