

Lesson Five: Vector Draw Software II

Upon completion of this unit, the student will learn:

- ✓ What a vector graphic is
- ✓ How to add graphics to files
- ✓ When should vector graphic file formats be used

The student will complete the following activities:

Reading Lesson 5:

- ✓ Continue the Adobe Illustrator Tutorial

Exercise 5: (Initial Design) Using the Adobe Illustrator program, create a border one and one-half inches from the edge of the page. Using the initials of your name rotate the letters of your initials and make each of them touch each other or the edge of the box. Fill the space with at least 20 different combinations of fonts, styles and sizes of letters. Convert the document to a PDF file and save the file as: MyLastName_Exercise_05.pdf. Send it as an email attachment to your instructor at sthomps3@houstonisd.org with the subject line: MyLastName Exercise 05. (Example: Thompson Exercise 05)

Please read the instructions carefully. To receive credit for this assignment, the file must be sent to the correct email address and have the correct file name, title, and heading. You will receive a confirmation email. Save the confirmation email as proof of submission.
